

Runwaiz

A new airports / airlines collaboration for safer and smarter operations

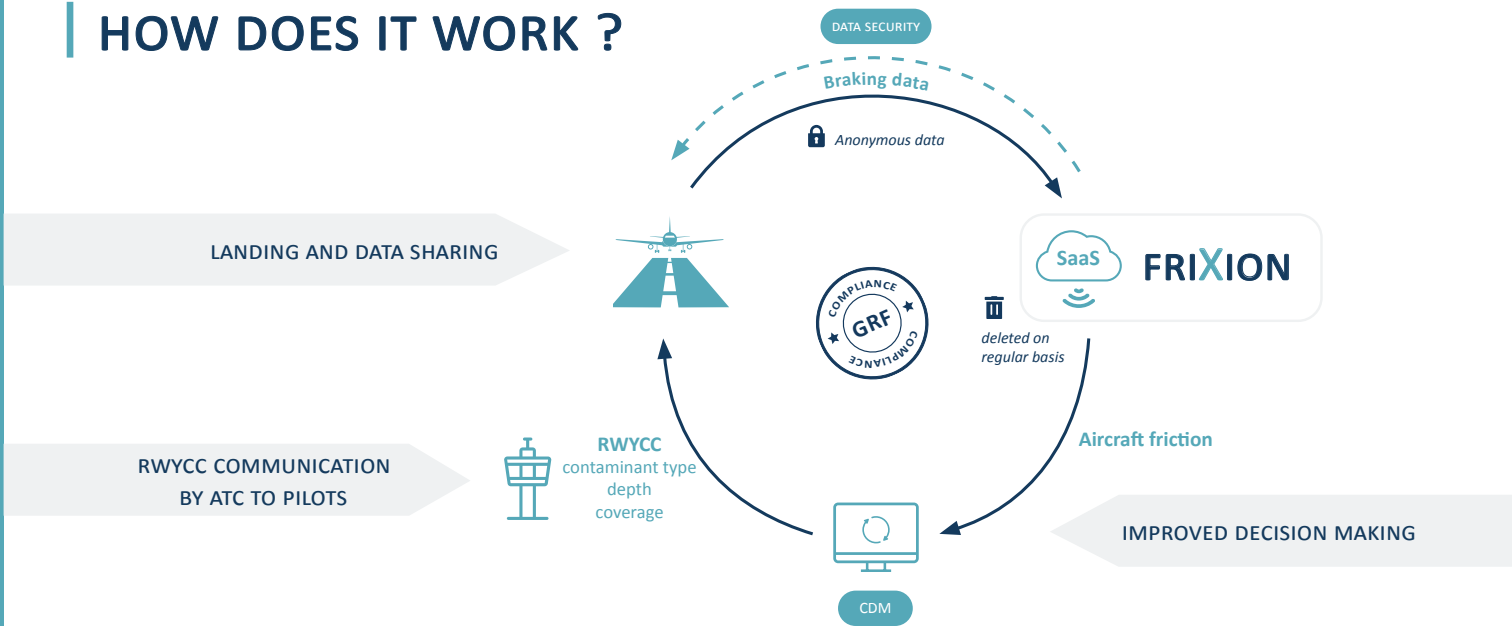

FriXion™ improves runway conditions assessment using full potential of aircraft braking data

WHAT IS FRIXION ?

- fr*ixion* is a software solution which provides automatically the most representative and accurate picture of the runway friction conditions
- fr*ixion* smart algorithms compute aircraft data into third party friction data

HOW DOES IT WORK ?

IMPROVE MAINTENANCE ACTIONS

by using continuous friction measurements

DECISION MAKING TOOL

by supporting operating teams during meteorological events

REDUCING SAFETY RISKS

by the best knowledge of runway friction conditions
